

MPLS IPVPN

With an MPLS IPVPN you can unite your geographically diverse sites through a reliable and secure private network. This Wide Area Network (WAN) solution supports fast and high-volume data transfer through a choice of access technologies – from basic broadband to fibre Ethernet. Our dedicated experts are on-hand to deliver a solution with the scalability to match your strategic goals.

Ideal for:

Multi-site businesses that need to share data

Businesses that want a private network solution without considerable capital expense

Retailers with POS Services, Chip & PIN and stock/control management

Businesses with collaborative applications such as video conferencing

High speed, secure data transfer

Our Next Generation MPLS IPVPN is a business grade solution for multi-site businesses. It enables you to consolidate voice, video and data to provide secure private networking on a resilient and reliable network. Supporting fast and high-volume data transfer to disparate sites and home workers.

Flexible and future proof

As your applications move online, you need high-speed connectivity to unite Wide Area Network sites. Our MPLS IPVPN solutions give you a complete choice of connectivity and resilience options. Flexible bandwidth is delivered through a choice of accesses including Ethernet, EFM, EoFTTC and Broadband, helping you to future-proof your network and support business critical applications.

How will our MPLS IPVPN solution benefit you and your business?

An affordable solution

With our MPLS IPVPN, you can connect individual sites securely at a much lower cost. We have more points of presence than any other provider, so we can pass our economies of scale savings onto you.

Optimise your network

Optimising your network design reduces bandwidth-related expenses. Our feature-rich products enable you to improve performance and reduce the total cost of ownership by consolidating voice and data.

Free monitoring tool

We make it easy to manage your network with a monitoring tool that delivers excellent visibility. View how your network is being used, identify faults and potential bandwidth inefficiencies to help you resolve issues quickly and maximise uptime, so you can optimise your network and reduce costs.

Fully-managed MPLS IPVPN

Our MPLS IPVPN solution includes managed business-grade Cisco routers, firewalls and an online monitoring tool. We will deliver, configure, install and maintain your routers, helping to free-up your IT department from day-to-day management so they can focus on strategic priorities and business activities. From a small, 2-site network to thousands of sites in a single solution, we can scale as your business grows.

Centralised applications

An MPLS IPVPN also enables you to integrate your assets into our Next Generation Data Centre, so you can benefit from centralised applications and improve processes, as well as free up management time and reduce overheads.

About TalkTalk Business

TalkTalk Business is one of the UK's fastest growing B2B telecoms providers, offering a full range of business-grade communications products and services, spanning internet access, data, voice and mobile. Our mission is to deliver what matters most to our 180,000+ business and public sector customers, and 800+ Partners, through consistently reliable, easy-to-use, innovative, great value solutions.

TalkTalk Business is truly innovative, looking for ways to disrupt the market and deliver value back to our customers. Following an investment of over £600m, we operate one of Britain's largest Next Generation Networks, with 95% coverage across the UK and more than 3,000 enabled exchanges for Ethernet, EFM and Business Broadband.

With over 20 years' experience providing support to customers - from national retailers to sole traders - and with future-proof, scalable technology, and standout service, TalkTalk Business aims to empower you to connect to the things that matter most: your customers, your employees and your suppliers.
