

Cloud-ready Private Network

With a Cloud-ready Private Network (also known as MPLS) you can unite your geographically diverse sites through a reliable and secure Private Network. This Wide Area Network (WAN) solution supports fast and high-volume data transfer through a choice of access technologies – from basic broadband to fibre Ethernet, with additional access technologies in the pipeline. Our Cloud-ready core network investment means you can benefit from 330 direct peering relationships with a virtually ubiquitous set of cloud providers. Your cloud applications connect directly to them, avoiding lesser Internet connections. Our dedicated experts are on-hand to deliver a solution with the scalability to match your strategic goals.

Ideal for:

Multi-site businesses that need to share data privately in a secure and protected environment.

Businesses that want a Private Network solution without considerable capital expenditure.

Businesses with Point of Sale services, Chip & PIN, stock and control management.

Businesses with collaborative applications such as video conferencing, Office 365 etc.

High speed, secure data transfer

Our Next Generation Cloud-ready Private Network is a business grade solution for multi-site businesses. It enables you to consolidate voice, video and data to provide secure private networking on a resilient and reliable network. Supporting fast and high-volume data transfer to disparate sites and home workers.

Flexible and future-proof as your applications move online, you need high-speed connectivity to unite Wide Area Network sites. Our Cloud-ready Private Network solutions give you a complete choice of connectivity and resilience options. Flexible bandwidth is delivered through a choice of accesses including Ethernet, EFM, EoFTTC and Broadband, helping you to future-proof your network and support business critical applications.

An affordable solution

With our Cloud-ready Private Network, you can connect individual sites securely at a much lower cost. We have more points of presence than any other provider, so we can pass our economies of scale savings onto you.

Optimise your network

Optimising your network design reduces bandwidth-related expenses. Our feature-rich products enable you to improve performance and reduce the total cost of ownership by consolidating voice and data, whilst offering you Multi-Service Connectivity, so you can prioritise and manage your business critical services, all done at a single point of connectivity, giving you great value.

For more information about Multi-Service Connectivity and how it can transform your business, please download our Hybrid Network Datasheet at talktalkbusiness.co.uk.

Monitoring tool

We make it easy to manage your network with a monitoring tool that delivers excellent visibility. View how your network is being used, identify faults and potential bandwidth inefficiencies to help you resolve issues quickly and maximise uptime, so you can optimise your network and reduce costs. You also have the option to choose Enhanced Monitoring, which gives you in greater visibility of your Private Network, specifically for your business critical sites.

Fully-managed Private Network

Our Cloud-ready Private Network solution can include managed business-grade Cisco routers, firewalls and an online monitoring tool. We will deliver, configure, install and maintain your routers, helping to free-up your IT department from day-to-day management so they can focus on strategic priorities and business activities. From a 2-site network to thousands of sites in a single solution, we can scale as your business grows.

Centralised applications

A Cloud-ready Private Network also enables you to integrate your assets into our Next Generation Data Centre, so you can benefit from centralised applications and improve processes, as well as free up management time and reduce overheads.

About TalkTalk Business

TalkTalk Business is one of the UK's fastest growing B2B telecoms providers, offering a full range of business-grade communications products and services, spanning Connectivity and Networking, Hosted Solutions, Mobile, Voice and IP telephone systems. Our mission is to deliver what matters most to our 180,000+ business and public sector customers, and 800+ Partners, through consistently reliable, easy-to-use, innovative, great value solutions.

TalkTalk Business is truly innovative, looking for ways to disrupt the market and deliver value back to our customers. Following an investment of over £600m, we operate one of Britain's largest Next Generation Networks with 100% UK coverage, 95% on our network. We can deliver to over 3,000 exchanges, on-net for EFM and Fibre Ethernet, giving us circa 60% more local exchanges than BT.

With over 20 years' experience providing support to customers - from national retailers to sole traders - and with future-proof, scalable technology, and standout service, TalkTalk Business aims to empower you to connect to the things that matter most: your customers, employees and suppliers.
