

Internet Access (Ethernet in the First Mile)

Stand out from the crowd and differentiate your business in a commodity marketplace. Upgrade your customers to business grade connectivity at a more affordable price than competitors with Business Grade Internet Access (EFM) from TalkTalk Business.

It bridges the gap for greater speeds without your customers having to commit to the cost of full fibre Ethernet. As well as opening up extra ongoing revenue opportunities to boost your business for the long-term with complementary solutions and services.

Our Cloud-ready core network investment means you can benefit from 330 direct peering relationships with a virtually ubiquitous set of cloud providers. Your cloud applications connect directly to them, avoiding lesser Internet connections.

Ideal for:

Businesses of all sizes

Businesses that need a faster connection for critical applications

Companies that want more bandwidth without going to full-blown Ethernet

Businesses with satellite and branch offices that need resilient connections and centralised sales systems

How will our Internet Access (EFM) solution benefit you and your customers?

About TalkTalk Business

TalkTalk Business is one of the UK's fastest growing B2B telecoms providers, offering a full range of business-grade communications products and services, spanning internet access, data, voice and mobile. Our mission is to deliver what matters most to our 180,000+ business and public sector customers, and 800+ Partners, through consistently reliable, easy-to-use, innovative, great value solutions.

TalkTalk Business is truly innovative, looking for ways to disrupt the market and deliver value back to our customers. Following an investment of over £600m, we operate one of Britain's largest Next Generation Networks, with 100% coverage, 95% on our network. We can deliver to over 3,000 exchanges, on-net for EFM + Fibre Ethernet, giving us circa 60% more local exchanges than BT.

With over 20 years' experience providing support to customers - from national retailers to sole traders - and with future-proof, scalable technology, and standout service, TalkTalk Business aims to empower you to connect to the things that matter most: your customers, your employees and your suppliers.

Affordable upgrades

Internet Access (EFM) is ideal for businesses that need higher capacity than broadband, but don't have the budget to invest in fibre Ethernet. It's a strong up-sell proposition for customers on broadband, SDSL, leased-line or low-end Ethernet. So you can provide affordable connectivity that supports business-critical applications like VoIP and hosted solutions.

Priced to maximise margins

We deliver lower pricing so you can really build your profits. Our Internet Access (EFM) is the most competitively priced solution on the market, so you can enjoy greater margin potential. And the more you sell, the cheaper Internet Access (EFM) is due to our discount for committed volume contribution.

A flexible solution

Internet Access (EFM) bridges the gap from existing broadband technology to a high-speed, business grade product. It gives customers a choice of two multi-pair options with bandwidth of up to 10 or 20 Mbps, and the option to use Internet Access (EFM) as direct internet access or as part of a Private Network (MPLS) solution.

Business grade features

Internet Access (EFM) offers the latest in connectivity with unlimited usage, no additional bandwidth charges, future-proof access and fail-safe connectivity. Our one and three year contracts also offer the potential to develop customer loyalty.

Installation support

Providing a smooth transition onto the TalkTalk Business Cloud-ready Network is easy thanks to our dedicated installation support team and. We have extensive experience of migrating customers to our Broadband services with minimal disruption.

Online APIs

TalkTalk Business delivers full accessibility and control with a suite of market-leading online API's. Our portal supports you every step of the way so you can deliver fast customer service, manage operational tasks pro-actively and resolve any issues quickly to minimise your costs.

Hardware

To help you reduce your overheads and need for in-house skills and resources we can provide additional services, including installation and all hardware.
