

## Hosted Data Centre

1

### Connectivity options

Sitting in the core of our NGN, access can be provided privately to your on-net connections using an MPLS IPVPN network, to an alternative supplier via existing or new interconnects or directly to the internet.

2

### Data Centres

Our Data Centre portfolio includes new build tier 3+ facilities designed to be massively scalable and flexible enough to incorporate your changing needs and new technologies.

3

### Internet breakout

Protect your central internet break with managed security and rest assured there will always be capacity to meet your bandwidth needs.
